

CE

Model Number

UB200-12GM-E5-V1

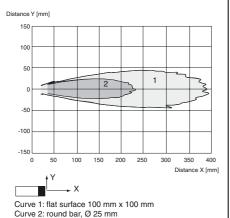

Single head system

Features

- · Switch output
- Very small unusable area
- 5 output modes
- **Program input**
- **Temperature compensation**

Curves

Characteristic response curve

Technical data

General Specifications	
Sensing range	15 200 mm
Adjustment range	20 200 mm
Unusable area	0 15 mm
Standard target plate	100 mm x 100 mm
Transducer frequency	approx. 400 kHz
Response delay	approx. 30 ms

Indicators/operating means

maneater e, e per atting means	
LED yellow	indication of the switching state
	flashing: program function object detected
LED red	permanently red: Error red, flashing: program function, object not detected

Electrical specifications

Operating voltage U _B	30 V DC , ripple 10 % _{SS}
----------------------------------	-------------------------------------

≤ 30 mA No-load supply current I₀

Input 1 program input Input type

operating distance 1: -U_B ... +1 V, operating distance 2: +6 V

input impedance: > 4,7 k Ω program pulse: \geq 1 s

Output

Output type	1 switch output E5, pnp NO/NC, programmable
Rated operational current I _e	100 mA, short-circuit/overload protected
Voltage drop U _d	≤ 3 V
Repeat accuracy	≤1 %
Switching frequency f	≤ 13 Hz
Range hysteresis H	1 % of the set operating distance
Temperature influence	± 1.5 % of full-scale value

Ambient conditions

Ambient temperature	-25 70 °C (248 343 K)
Storage temperature	-40 85 °C (233 358 K)

Clorage temperature	10 00	0 (200 000 11)
echanical specifications		

Protection degree IP67

Connection	V1 connector (M12 x 1), 4-pi

Material

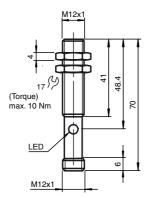

Housing brass, nickel-plated epoxy resin/hollow glass sphere mixture; foam polyurethane, cover PBT Transducer

Mass Compliance with standards and

directives Standard conformity

IEC 60947-5-2:2007

Dimensions

Electrical Connection

Standard symbol/Connections: (version E5, pnp)

Core colours in accordance with EN 60947-5-2.

Pinout

Connector V1

Adjusting the switching points

The ultrasonic sensor features a switch output with two teachable switching points. These are set by applying the supply voltage -U $_{\rm B}$ or +U $_{\rm B}$ to the TEACH-IN input. The supply voltage must be applied to the TEACH-IN input for at least 1 s. LEDs indicate whether the sensor has recognised the target during the TEACH-IN procedure. Switching point A1 is taught with -U $_{\rm B}$, A2 with +U $_{\rm B}$.

Five different output functions can be set

- 1. Window mode, normally-open function
- 2. Window mode, normally-closed function
- 3. one switching point, normally-open function
- 4. one switching point, normally-closed function
- 5. Detection of object presence

TEACH-IN window mode, normally-open function

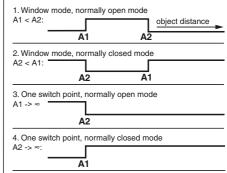

- Set target to near switching point
- TEACH-IN switching point A1 with -U_B
- Set target to far switching point
- TEACH-IN switching point A2 with +U_B

TEACH-IN window mode, normally-closed function

- Set target to near switching point
- TEACH-IN switching point A2 with +U_B

Additional Information

Programmable output modes

5. A1 -> ∞, A2 -> ∞: Object presence detection mode Object detected: Switch output closed No object detected: Switch output open

Accessories

UB-PROG2

Programming unit

BF 5-30

Mounting flange

BF 12

Mounting flange

BF 12-F

Mounting flange

V1-G-2M-PVC

Cable connector

V1-W-2M-PUR

Cable connector

UVW90-M12

Ultrasonic -deflector

- Set target to far switching point
- TEACH-IN switching point A1 with -U_B

TEACH-IN switching point, normally-open function

- Set target to near switching point
- TEACH-IN switching point A2 with +U_B
- Cover sensor with hand or remove all objects from sensing range
- TEACH-IN switching point A1 with -U_B

TEACH-IN switching point, normally-closed function

- Set target to near switching point
- TEACH-IN switching point A1 with -U_B
- Cover sensor with hand or remove all objects from sensing range
- TEACH-IN switching point A2 with +U_B

TEACH-IN detection of objects presence

- Cover sensor with hand or remove all objects from sensing range
- TEACH-IN switching point A1 with -U_B
- TEACH-IN switching point A2 with +U_B

Default setting of switching points

A1 = blind range, A2 = nominal distance

LED Displays

Displays in dependence on operating mode	Red LED	Yellow LED
TEACH-IN switching point:		
Object detected	off	flashes
No object detected	flashes	off
Object uncertain (TEACH-IN invalid)	On	off
Normal operation	off	Switching state
Fault	on	Previous state

Installation conditions

If the sensor is installed at places, where the environment temperature can fall below 0 °C, for the sensors fixation, one of the mounting flanges BF 12, BF 12-F or BF 5-30 must be used. In case of direct mounting of the sensor in a through hole, it has to be fixed at the middle of the housing thread.
