

INDUSTRIAL BUZZERS ACOUSTIC

Acoustic Signals Industrial Buzzers > AE30M Series

Product Overview

The AE30M flat top and trumpet top miniature buzzers produce a rich, low frequency sound, ideal for security, automotive and industrial signalling. Using a traditional buzzer

mechanism, AE30M buzzers produce a high quality sound compared with most piezo based products.

The compact design and convenient fixing hole allow for easy installation in all locations. The units are colour coded: Black = 12v Dc, Red = 24v Dc. These products were formerly supplied by Klaxon.

Features

- High quality “real buzzer” sound
- Termination by male & female spade terminal
- 12 or 24v Dc units
- Flat or Trumpet top options
- Compact design
- Fixing hole provided for ease of installation
