DATA SHEET				
1. Scope of Application This data sheet is applied to the 1	LED package, m	odel CLL620-0)101B2-273M1	C5.
2. Part code CLL 620 - [1]	$01 \\ 121 \\ 131 \\$	2 - 27	$\frac{3}{51} \frac{M1}{61}$ (25
[1] Part Code				
[2] Dies in series quantity	1			
[3] Dies in parallel quantity	1			
[4] Correlated color temperature	2700K			
[5] Chromaticity range	MacAdam	3Step		
[6] CRI	Ra 80min.			
< Features > External Dimensions 2.0 x 0.8 x Internal Structure: Chip LED Luminous Flux: 24.9 lm @ 80 m CCT: 2700K (M a c A d a m 3) CRI: Ra 80min. Thermal Resistance: 90 C/W RoHS Compliant 	0.75 Type A Step)			
		Symbol	C	ITILED
		Name	CLL620-01	101B2-273M1C5
		CITIZEN E	LECTRONIC	<u>S CO.,LTD. JAPAN</u>

4. Performance

(2) Electro-optical Characteristics

						Ts=25C
Parameter	Symbol	Condition	Min.	Тур.	Max.	Unit
Forward Voltage	$V_{\rm F}$	IF=80mA	2.90	3.20	3.50	V
Reverse Current	I _R	VR=5V	-	-	100	μA
Luminous Flux	$\Phi_{\rm V}$	IF=80mA	21.1	24.9	28.7	lm
CRI	Ra	IF=80mA	80	83	-	-
Thermal Resistance	Rj- s *1	Junction-Solder	-	90.0	-	C/W

*1 Thermal Resistance : Junction-Solder terminal

(3) Ranking (Condition : IF=80mA, Ts=25C)

Parameter	Symbol	Rank	Min.	Max.	Unit
		Q	2.90	3.10	
Forward Voltage	$V_{\rm F}$	R	3.10	3.30	V
		S	3.30	3.50	
		В	21.1	23.6	
Luminous Flux	Φ_{V}	С	23.6	26.2	lm
		D	26.2	28.7

6. Reliability

(1) Datails of the tests

Test Item	Test Condition
Continuous Operation Test	IF=80mA Ta= $25C \times 1000$ hours
Low Temperature Storage Test	-40 C × 1000 hours
High Temperature Storage Test	100 C × 1000 hours
Moisture-proof Test	85 C, 85 %RH for 500 hours
Thermal Shock Test	$-40 \text{ C} \times 30 \text{ minutes} - 100 \text{ C} \times 30 \text{ minutes}, 100 \text{ cycle}$

(2) Judgement Criteria of Failure for Reliability Test

(Ta=25C)

			(14 200)
Measuring Item	Symbol	Measuring Condition	Judgement Criteria for Failure
Forward Voltage	VF	IF=80mA	>U X 1.1
Reverse Current	I_R	$V_{F}=5V$	> U×2
Total Luminous Flux	Φ_V	IF=80mA	<s 0.7<="" td="" x=""></s>

U defines the upper limit of the specified characteristics. S defines the initial value.

Note : Measurement shall be taken between 2 hours and 24 hours, and the test pieces should be return to the normal ambient conditions after the completion of each test.

9. Packing Specifications

9-1. Moisture-proof Packing

To prevent moisture absorption during transportation and storage, reels are packed in aluminum envelopes

9-2. Storage

To prevent moisture absorption, it is strongly recommended that reels (in bulk or taped) should be stored in the dry box (or the desiccator) with a desiccant as the appropriate storage place. If not, the following is recommended.

Temperature :	5~30C
Humidity :	60%RH max.

The devices should be mounted as soon as possible after unpacking. If you store the unpacked reels, please store them in the dry box or seal them into the envelop again.

Moisture Sensitive Level 1. (IPC/JEDEC J-STD-020C)

Storage limitation : Before Unpacked Alminium envelop : 1 year from delivered day. After Unpacked Alminium envelop : 168H

10. Precautions

(1) Handling with care for this product

-When assembling the circuit board into the finished products, care must be taken to avoid the component parts from touching other parts.

-Please avoid the resin area from being pressed, stressed, rubbed, come into contact with sharp metal nail (e.g. edge of reflector part) because the function, performance and reliability of this product are negatively impacted.

(2) Countermeasure against static electricity

-Handling of this product needs countermeasures against static electricity because this is a semiconductor product.

Please take adequate measures to prevent any static electricity being produced

such as the wearing of a wristband or anti-static gloves when handling this product.

-Every manufacturing facility in regard to the product (plant, equipment, machine, carrier machine and conveyance unit) should be connected to ground and please avoid the product to be electric-charged. -After assembling the LEDs into your final product(s), it is recommended to check

whether the assembled LEDs are damaged by static electricity (electrical leak phenomenon) or not.

-It is easy to find static damaged LED dies by a light-on test with the minimum current value.

(3) Thermal Design

-The thermal design to draw heat away from the LED junction is most critical parameter for an LED illumination system. High operating temperatures at the LED junction adversely affect the performance of LED's light output and lifetime. Therefore the LED junction temperature should not exceed the absolute maximum rating in LED illumination system.

-The LED junction temperature while operation of LED illumination system depends upon thermal resistance of internal LED package (Rj·c), outer thermal resistances of LED package, power loss and ambient temperature. Please take both of the thermal design specifications and ambient temperature conditions into consideration for the setting of driving conditions. -For more information, please refer to application note "Thermal Management".

(4) Driving Current

-A constant current is recommended as an applying driving current to this product.

In the case of constant voltage driving, please connect current-limiting resistor to each products in series and control the driving current to keep under the absolute maximum rating forward current value. •Electrical transient might apply excess voltage, excess current and reverse voltage to the product(s).

They also affect negative impact on the product(s) therefore please make sure that no excess voltage, excess current and reverse voltage is applied to the product(s)

when the LED driver is turn-on and/or turn-off.

-For more information, please refer to application note "Driving".

10. Precautions (continued)		
(5) Lighting at a minimum current value		
-In a case where the minimum current(IF min) is applie some of LED dice in the product might look different in due to the individual difference of the LED dice, and th	ed to the produ n their brightn hey are not fai	ct, iess led.
(6) Eye Safety		
 The International Electrical Commission (IEC) publish "2006 Photobiological safety of lamps and lamp system When sorting single LEDs according to IEC 62471, alm as belonging to either Exempt Group (no hazard) or Ri However, Optical characteristics of LEDs such as radia spectrum and light distribution are factors that affect and especially a high-power LED, that emits light cont might have properties equivalent to those of Risk Grou Great care should be taken when directly viewing an L has multiple uses as a module or when focusing the lig as these actions might greatly increase the hazard to y It is recommended to regard the evaluation of stand-ale and to evaluate your final product. 	and in 2006 IE ons "which incl nost all white I sk Group 1 (lo ant flux, the risk group taining blue w up 2 (moderate ED that is dri ght with optica your eyes. one LED packs	C 62471 Judes LEDs within its scope. 11. Precautions with regard to product use

(1) This document is provided for reference purposes only so that CITIZEN ELECTRONICS' products are used as intended. CITIZEN ELECTRONICS neither makes warranties or representations with respect to the accuracy or completeness of the information contained in this document nor grants any license to any intellectual property rights or any any other rights of CITIZEN ELECTRONICS or any third party with respect to the information in this document.

(2) All information included in this document such as product data, diagrams, charts, is current as of the date this document is issued.

Such information, however, is subject to change without any prior notice. Before purchasing or using any CITIZEN ELECTRONICS' products listed in this document, please confirm the latest product information with a CITIZEN ELECTRONICS' sales office, and formal specifications must be exchanged and signed by both parties prior to mass production.

(3) CITIZEN ELECTRONICS has used reasonable care in compiling the information included in this document, but CITIZEN ELECTRONICS assumes no liability whatsoever for any damages incurred as a result of errors or omissions in the information included in this document.

(4) Absent a written signed agreement, except as provided in the relevant terms and conditions of sale for product, and to the maximum extent allowable by law, CITIZEN ELECTRONICS assumes no liability whatsoever, including without limitation, indirect, consequential, special, or incidental damages or loss, including without limitation, loss of profits, loss of opportunities, business interruption and loss of data, and disclaims any and all express or implied warranties and conditions related to sale, use of product, or information, including warranties or conditions of merchantability, fitness for a particular purpose, accuracy of information, or no infringement.

(5) Though CITIZEN ELECTRONICS works continually to improve products' quality and reliability, products can malfunction or fail. Customers are responsible for complying with safety standards and for providing adequate designs and safeguards to minimize risk and avoid situations in which a malfunction or failure of a product could cause loss of human life, bodily injury or damage to property, including data loss or corruption. In addition, customers are also responsible for determining the appropriateness of use of any information contained in this document such as application cases not only with evaluating by their own but also by the entire system. CITIZEN ELECTRONICS assumes no liability for customers' product design or applications.

(6) Please contact CITIZEN ELECTRONICS' sales office if you have any questions regarding the information contained in this document, or if you have any other inquiries.
